

REMEDICATION AND REDEVELOPMENT (RR) NEWS FROM WISCONSIN DNR
July 9, 2003

CHAPTER NR 140 UPDATED

DNR's Drinking and Groundwater Program has updated Chapter NR 140, Wis. Admin. Code, Groundwater Quality. The revisions are related to the application of trihalomethane groundwater quality standards at aquifer storage & recovery (ASR) systems. The effective date of the new Chapter NR 140 is July 1, 2003. Please recycle (or file for historical purposes) your old copies. You may go to the following web site to print a copy of the new revisions.

<http://www.legis.state.wi.us/rsb/code/nr/nr140.pdf>

You may also purchase printed copies from the state office of Document Sales at (608) 266-3358. Document Sales, however, does not sell individual code chapters so you would need to purchase the entire NR 100 series. A summary of the NR 140 rule revisions is as follows:

- The definitions of "ASR", "ASR displacement zone", "ASR system" and "specified substance" have been added to the code.
- The point of standards application for chloroform, cromodichloromethane, dibromochloromethane and bromoform at ASR sites has been added.
- An ASR system design management zone has been established.

If you have any questions regarding these revisions, please contact Bill Phelps, Drinking and Groundwater Program, at 608-267-7619, or at William.Phelps@dnr.state.wi.us.
